#### Payment log

#	Payment Date	Amount Paid	Payment Mode	Invoice/Receipt No.	Received By
---	--------------	-------------	--------------	---------------------	-------------

the 1990s, the number of people in the world who are under 15 years of age has increased from 1.1 billion to 1.5 billion. The number of people aged 65 and over has increased from 200 million to 350 million. The number of people aged 15–64 years has increased from 1.5 billion to 2.0 billion.

There are a number of factors which have contributed to the increase in the number of people in the world who are under 15 years of age. These factors include a decline in the death rate, a decline in the birth rate, and a decline in the rate of migration.

The decline in the death rate has been the most significant factor in the increase in the number of people in the world who are under 15 years of age. This decline has been due to a number of factors, including improvements in medical care, a decline in the incidence of infectious diseases, and a decline in the incidence of violence.

The decline in the birth rate has also contributed to the increase in the number of people in the world who are under 15 years of age. This decline has been due to a number of factors, including a decline in the number of children born to women, a decline in the number of children born to men, and a decline in the number of children born to couples.

The decline in the rate of migration has also contributed to the increase in the number of people in the world who are under 15 years of age. This decline has been due to a number of factors, including a decline in the number of people who are migrating from one country to another, a decline in the number of people who are migrating from one region to another, and a decline in the number of people who are migrating from one social class to another.

The increase in the number of people in the world who are under 15 years of age has a number of implications. These implications include a decline in the number of people who are in the workforce, a decline in the number of people who are paying taxes, and a decline in the number of people who are contributing to the economy.

The increase in the number of people in the world who are under 15 years of age also has a number of implications for the environment. These implications include a decline in the number of people who are using natural resources, a decline in the number of people who are polluting the environment, and a decline in the number of people who are contributing to climate change.

The increase in the number of people in the world who are under 15 years of age also has a number of implications for the future. These implications include a decline in the number of people who are living in poverty, a decline in the number of people who are living in slums, and a decline in the number of people who are living in the developing world.

The increase in the number of people in the world who are under 15 years of age also has a number of implications for the quality of life. These implications include a decline in the number of people who are healthy, a decline in the number of people who are educated, and a decline in the number of people who are employed.

The increase in the number of people in the world who are under 15 years of age also has a number of implications for the future of the world. These implications include a decline in the number of people who are living in peace, a decline in the number of people who are living in freedom, and a decline in the number of people who are living in a just and equitable world.

The increase in the number of people in the world who are under 15 years of age also has a number of implications for the future of the planet. These implications include a decline in the number of people who are living in a sustainable world, a decline in the number of people who are living in a world that is free from poverty, and a decline in the number of people who are living in a world that is free from violence.

The increase in the number of people in the world who are under 15 years of age also has a number of implications for the future of humanity. These implications include a decline in the number of people who are living in a world that is free from suffering, a decline in the number of people who are living in a world that is free from pain, and a decline in the number of people who are living in a world that is free from death.
